

# POLY MINI

The perfect size for any job site

Ever get the request for a portable restroom that can fit inside of a freight elevator but still offers the same privacy as a standard size portable restroom? Look no further than the Poly Mini. A customer created portable restroom designed to keep its maximum height low enough to slide or roll into a freight elevator. The unit boasts the same interior features as our standard-size, base model units. Shown here with optional high rise kit and caster wheels.

**Features Include:**

- Maximum height low enough to slide or roll into a freight elevator
- 60-gallon waste tank which boasts a smooth interior and deep sump
- Toilet seat and cover
- Urinal
- Three-roll toilet paper holder with rod and padlock
- Modular, all-common wall construction makes for easy and inexpensive repairs
- High molecular-weight material with extra UV protection ensures that your units will continue to look new through years of work

Standard Colors

Specialty Colors

Specifications	U.S. Standard	Metric
Length	43"	1.09 m
