

Breeze

Why?

With an eye-catching design and sealed water tank to ensure proper hygiene, the Breeze will thrill event coordinators who truly want both. It has two stations with full fingertip to elbow washing and operates with hands-free baby foot pumps that have been standard in Satellite products for many years, providing care-free operation.

The new Breeze comes with features operators say they want in a handwash station. To maintain its attractiveness, the blue areas have a fleck pattern to hide scuffs and scratches. It also has extended bumpers on the sides and top to buffer it while traveling. There are fresh and gray water drain plugs and an additional pump-out port on the base for waste water. To aid drivers, all plugs are tethered to the unit to prevent loss or damage. It has two handles for lifting and fits easily inside most portables for ease of transporting. Most of all, it has a sealed fresh-water tank where chlorine can be added to kill bacteria. All in all, it is a breeze to maintain and operate.

Color

Gray/Ice Blue

Features

Tethered cap securely conceals and protects freshwater fill.

The Breeze can accommodate several different soap dispensers.

Pump-out port integrated into base saves servicing time.

Multiple paper towel dispensers allow for the Breeze to be serviced less frequently.
