

IMPACT BASE

RESTROOM LIFT KIT

Servicing multi-story construction sites has never been easier with the Satellite Industries portable restroom lift kit. Designed to fit all Satellite Standard restrooms with the Impact base, this lift kit allows for easy raising and lowering, even with a full tank of freshwater or wastewater.

The dual hook system stabilizes the restroom during lifting and lowering, preventing it from spinning. Combine it with Satellite's Porta Seal to ensure no waste or water spills during the process.

HIGHRISE

LIFT KIT

Uniquely fitted to the Highrise unit, a firm bond is made as the metal bars fasten directly to the unit and the top section has the added flexibility to pivot for added clearance.
