

JETS™ NOMAD

Jets™ NOMAD is a scalable system consisting of five units designed to be combined to your specific need at any site - anywhere. The modular concept makes installation quick and easy.

TRANSFER UNIT

The Transfer Tank Unit increases flexibility of the vacuum system. This unit allows you to set up the Jets™ NOMAD system even far from drains.

FLOW CONTROL UNIT

Ensures gravity flow to drain of up to:

- 3.75 l/sec to mains sewage
- 1.2 gal/sec to mains sewage

WATER SUPPLY UNIT

The Water Supply Unit distributes water for the toilets, urinals and vacuum stations. The unit provides a category 5 protection of mains water supply.

CATCHER UNIT

The Catcher Unit is designed to stop unwanted items from entering the pumps and eventually the sewer system. Easy clean out and service during operation.

(M/L/XL Duo) VACUUM UNIT

The Vacuum Unit creates vacuum, macerates sewage, and discharges.
