

CLIMATE CONTROLLED SERVICE AREA

# HANDWASH TRUCK

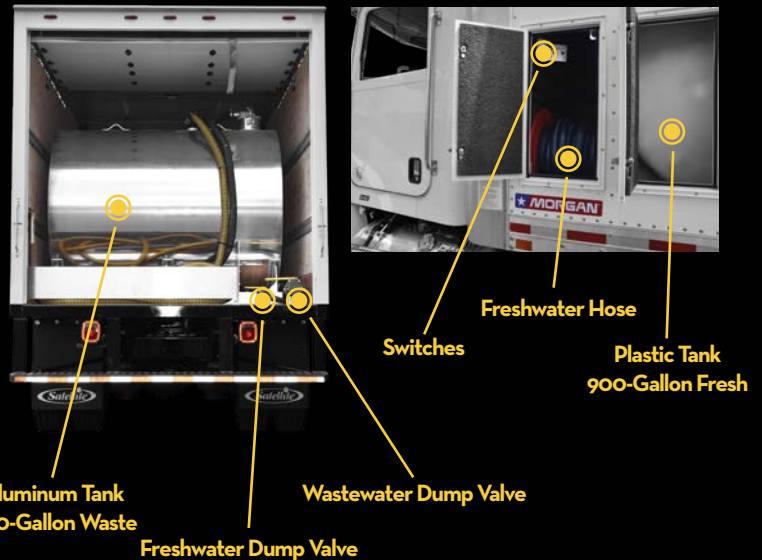

Climate Control System

Access Ports

## 900 GALLON WASTE / 900 GALLON FRESH

Satellite's Handwash Truck is ideal for routes that require servicing multiple handwash sinks. Dual 900-gallon tanks gives enough graywater space and freshwater to service 40 Tag 4 handwash sinks (22-gallon capacity). Service hatches on both sides of the truck allow for quick access to hoses and pumps. The temperature controlled box assures your fresh and wastewater tanks won't freeze in the coldest of climates.

- **CLIMATE CONTROL SYSTEM:** Esbar Echo 5 Diesel powered climate control system maintains a consistent temperature in the service area to prevent fresh and wastewater from freezing.
- **ACCESS PORTS:** Provide quick and easy access to tanks, switches, pumps, and hoses; allowing for quick servicing.
