Lowered Workstation
Driver Side

850 GALLON WASTE / 400 GALLON FRESH

The MD1250 tank is a medium-sized vehicle, able to maneuver in tighter spaces. The 850-gallon waste/400-gallon fresh tank has the capacity to handle most routes. Designed with the driver in mind, it comes with a lowered work station to make servicing a breeze, even for a smaller-stature driver.

If you're in the market for a new pump truck, the new F-600 chassis might be the configuration for you! The F-600's heavier GVWR allows Satellite to put a 1250-gallon tank on it, while maintaining the same footprint as its counterpart the F-550.

- **GALVANIZED STEEL UNIT HAULER:** This feature provides safe and secure points for transporting standard portable toilets, reducing effort for loading and unloading.
