

Vantage

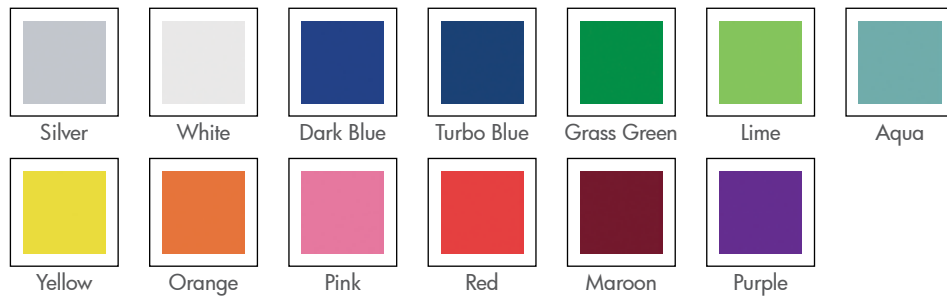

Why?

2016 brings a fresh upgrade to one of our most popular units. The Vantage model sports a smooth interior for easier cleaning and boasts a rivet-free exterior. This double wall unit is durable and contains 30 lbs more plastic than our other standard sized portable restrooms. An ergonomic design and eight huge hand-holds make handling the Vantage a breeze. A bolder locking mechanism rounds out the newest features found on the Vantage model. More than 70% of components used in the Vantage restroom are interchangeable with other PolyPortables standard units. The newest features include out revolutionary, self-closing hinges, a heavy-duty rotary latch, and a re-engineered door frame.

Ambassador Upgrade

Upgrade your Vantage to an Ambassador. The Ambassador fits the bill for even the most discriminating special event customer. Your customer will immediately notice the convenience of the flushing waste tank, in-unit hand wash station and the bevy of other accessories meant to help replicate as closely as possible their in-home restroom experience in a standard size portable unit.
