

Liquid Deodorizers

# STF

Many operators may not remember that Safe-T-Fresh was the very first environmentally safe deodorizer developed for the portable sanitation industry in 1970. Even then, Satellite was aware that protecting the environment was everyone's responsibility for the sake of future generations.

Today, Safe-T-Fresh is reformulated with the most advanced ingredients for fighting odors. Through research, testing and field observation, we've created a deodorizer that actually changes odor molecules instead of masking them. This revolutionary breakthrough in molecular technology continues the tradition of being environmentally safe, while delivering a much higher level of odor control. It is available in a variety of concentrations which allows you to choose what's best for your situation.
