

TAG 2

LIFT KIT

Increasingly, construction sites are requiring hand washing options. As is the case with portable restroom units, hand wash stations need to go where the workers are located, even in high-rise applications.

COMING SOON

TAG 4

LIFT KIT

Like its predecessor, the Tag2, the Tag4 is going high places. That is why our Engineers are hard at work finalizing the design on the Tag 4 Lift Kit. Functionality and mobility are the driving forces behind our new design. A heavy-duty Y-frame structure on one side provides the support and strength needed to lift the Tag4 to the top of a high-rise building. The open design allows for quick servicing and easy access to the freshwater fill and graywater evac-port. With the framework bolted to the cart the Tag 4 lift kit allows the Tag 4 to go anywhere!

PATHFINDER

The Pathfinder is a state-of-the-art sanitizing system that mounts to any service vehicle. It has a unique low pressure, chemical injection delivery system that proportions the chemical/water mix for maximum effectiveness. This system allows you to spray a cleaning agent like Pathfinder Solution or a hospital grade, EPA registered disinfectant like Enviro Bac 2 evenly throughout the restroom.

This sanitizing system reduces mold and odor causing bacteria by a staggering 86% over traditional cleaning methods. The benefit of our system over the traditional “scrub brush and soap” method is that we are not transferring bacteria and germs from one unit to another.

Everyone will appreciate the fresh, clean appearance of your restroom even more, knowing it has been thoroughly sanitized with each service.

INTENDED USES

- Portable Restrooms
- Handwash Sinks
- Restroom Trailers
- Shower Trailers
- Holding tanks
